WORK HISTORY

Frontend Developer Intern

TEDxDUCIC ↗

07/2018 – 08/2018

Achievements/Tasks

- This website was designed for a TEDx event. Built the entire UI from scratch. Used Bootstrap-4 for Responsiveness. Used JavaScript library Typewriter.js Other technologies used were Html-5 and CSS-3.
- Live At : tedxducic.com

Frontend Developer Intern

Spanish Bolo

01/2020 – Present

Achievements/Tasks

- Built the entire UI from scratch. Created a Youtube like interface for the user. Implemented 100% responsiveness using Bootstrap-4. Worked on speed optimization using google lighthouse tool. Technologies used were Html-5, CSS-3, Javascript-ES6 and Swiper.js library.
- Live At : bailabollywood.com

Video Editor Intern

Health-Mania ↗

06/2019 – 06/2019

Achievements/Tasks

- Was responsible for making Health-related content Videos. Did some Voice overs for the videos. Used Camtasia Studio-9 for editing videos.

TECHNICAL SKILLS

`JavaScript` `HTML 5` `CSS 3` `Bootstrap 4` `Github` `PWA` `Responsive Design` `React` `Video Editing`

PERSONAL PROJECTS

DiceToWin (05/2020 – 05/2020) ↗

- A small JavaScript-based game with some sound effects. I have added a Progressive Web App feature so that you can directly access it from your Home screen as well as play it offline. ENJOY.!!!
- Live At :https://vaibhavkaul69.github.io/dicetowin

Task-List (04/2020 – 04/2020)

- Users can Add or Delete a task. Implemented PWA technology making it installable on different devices. Used the LocalStorage API to save a task and fetch it back. I have also implemented cache versioning in it.
- Live At : https://vaibhavkaul69.github.io/Task-List/

Zootopia- The online Video Streaming Platform (03/2020 – 03/2020)

- Users can stream videos available on the internet. Used the CSS Grid System and CSS Flexbox for responsiveness and Javascript ES6, Html-5. The browser LocalStorage API helped in data transfer between multiple pages. The new version will have an AMP interface.
- Live At : https://vaibhavkaul69.github.io/Headout/

Calen Clone (06/2020 – Present)

- A PWA clone of Google Calendar. Users can Add, Delete, Edit, an event. I am working on the Add notification functionality in which the user will be notified before the event. I used the LocalStorage API to store the events data locally with cache versioning.
